Chuck review the indoor air samples collected in the headstart/EQP building in Feb. 2012. The data I sent you on Friday are the subslab samples from other buildings. I cc'ed you on all the documents I sent Chuck.

You should have the preliminary data for

- 1) headstart/EQP building
- 2) Cabo Rojo Pro Dry Cleaners
- 3) Serrano dry cleaners
- 4) walgreens fromer DEFDC

Yes, and just for clarification, the data that Chuck reviewed and commented on last week was subslab and indoor taken last year? And what you sent on Friday was the newest subslab taken last week? Are indoor samples also coming in?
